

- Need custom micro-nano fabrication?
- Want a faster route to successful prototypes?
- Looking for early-stage production?

**Webinar: Micro-nano Fabrication and Characterization Services for
Academic and Industrial R&D**

Tuesday, November 25
1:00 - 2:00pm EST

CMC Microsystems will present an overview of FACT Services (Fabrication, Assembly, Characterization, Test) for micro-nano R&D. FACT Services delivers results for academic and commercial clients using expertise and toolsets in a network of service-ready university nanofabrication labs across Canada.

Learn about the laboratories in the FACT network as they each showcase their services capabilities.

3IT.Nano lab
Université de Sherbrooke

Toronto Nanofabrication Centre (TNFC)
University of Toronto

nanoFAB
University of Alberta

Thin Films Group (GCM)
Polytechnique Montréal
