

Job Opening R&D Engineer

Posted: Oct. 8, 2015

Preciseley Microtechnology Corp, a fabless MEMS company, is looking for a highly qualified candidate to fill one full-time R&D Engineer position for MEMS optical module. The main responsibilities associated with this position include prototyping fabrication, characterization and supporting the design and packaging of MEMS chips. Knowledge of mechanical design, electronics and excellent communication skills are strong assets.

Candidates who wish to apply for this position should have first-hand experience in microfabrication and prototype development or optoelectronic packaging. Candidates should hold in physics, engineering, materials sciences or equivalent fields.

Interested candidates should apply via email, with a detailed CV and the contact information of at least two references, to **info@preciseley.com**. Please ensure all documents are in pdf and the subject line states *MEMS Engineer Job Opening*.

Only qualified applicants will be contacted for follow up.

Preciseley is an Edmonton-based company specialized in the development of optical MEMS and MEMS sensors and actuators.
